

Inspectors from the Care Inspectorate visit services to find out more about the quality of children's care, play and learning.

They want to check that:

The setting is safe

Children are loved, nurtured and having fun

There are strong connections with children and families

Children are learning through play

Children's health and wellbeing is promoted

It is important for inspectors to find out what is good about you and your child's experience.

Please share your views through the MS forms survey that will be issued to you from the childcare setting

Your feedback helps us to celebrate success and support improvement in your childcare setting
